

Walmart Canada launched their Sustainable Packaging Scorecard on July 1, 2009
[Register Now for Scorecard Training!](#)

Dear Vendor Partners,

Here at Walmart Canada, we continue to be committed to our three large sustainability goals: we aim to be supplied 100 percent by renewable energy, to create zero waste, and to sell products that sustain our resources and the environment. Reducing the amount of packaging in our supply chain plays a large role in our ability to meet each of these goals, that is why we need all of your support in populating the Packaging Scorecard. Basic Scorecard Entry,
Sustainability and Package
Modeling. [Register Now!](#)

Overview

Training is offered in partnership with [ECRM](#) and [Packaging Association of Canada](#), this course provides instruction to help attendees enter data into the Walmart Packaging Sustainability Scorecard. The course includes a detailed guide through scorecard input.

It also provides a review of the metrics associated with the Scorecard. A hands-on exercise will illustrate the power of Package Modeling 2.0 in helping you understand and improve your scores. The course includes a limited time license for the packaging scorecard allowing attendees to further acquaint themselves with its potential.

In this course, you will learn:

- What the Scorecard questions mean
 - What data need to be available
 - The mechanics of data entry
- An overview of Walmart's sustainability strategy
 - Answers to frequently asked questions
- In-depth examples illustrating key concepts

December 9th

Classes are limited to 28. Register Today!

Date: Wednesday, December 9th
