

Packaging Food Safety Summit – April 21, 2010

Join North American Industry Leaders in advancing food safety for packaging.

The day's program will include:

- Morning Symposium
- Break - Lunch provided
- PACsecure Committee Working Session
- 2010-2011 Food Safety Initiatives
 - Recall and Traceability
 - Audit Program
 - Online Training Tools
 - Pest Control
 - Terrorism and Food Security

What is PACsecure / HACCP?

The PACsecure standards, which were originally developed for the Canadian packaging converting sector for materials that have direct or incidental contact with food and beverage products, was developed by The Packaging Association (PAC), Agriculture and Agri-Food Canada, and the Canadian Food Inspection Agency.

For more information on PACsecure visit the [PAC website](#).
